Answers to Questions from P2.1

Name: Arnob Ghosh
Student ID: 103494114

1. Is the font type in helloworld2.html similar to helloworld.html (you created in the first week)?

"helloworld.html": Without any CSS, the font type will be the browser's default, which is usually Times New Roman or a similar serif font.
"helloworld2.html": Using Bootstrap CSS, the font type would be the default, which is usually a sans-serif font such as Helvetica Neue, Helvetica, or Arial.

2. What happens if you remove `<div class="container"></div>`?

Removing the from a Bootstrap-based HTML page removes a key component of the grid system that manages layout. The.container class creates a responsive fixed-width container that adapts to the screen size. Removing the would change the layout and responsiveness of your page.

3. What is the purpose of `<div class="container"></div>`?

Bootstrap's " wrapper helps create a responsive layout. It guarantees that the material is appropriately padded, centered, and not extended across the entire width of the viewport, resulting in a visually beautiful and understandable style. It is required for implementing Bootstrap's grid system since it includes the grid columns and rows and adjusts to different screen sizes, ensuring a consistent user experience across devices.
